DETAILED ACTION

1. The addition of claims 4-8 in the reply filed in 10/26/2005 is acknowledged.
2. Claims 1-8 are pending in the Application.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 47.
 - II. Claims 5-8, drawn to a semiconductor device, classified in class 257, subclass 452.
4. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process that does not include making at least a part of a N-semiconductor layer exposed by a mesa-cut in a vertical direction from a p-semiconductor layer to a part of the n-semiconductor layer.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

7. Applicants are encouraged, where appropriate, to check Patent Application Information Retrieval (PAIR) (<http://portal.uspto.gov/external/portal/pair>) which provides applicants direct secure access to their own patent application status information, as well as to general patent information publicly available.
